Third-Party Code Used in Alfabet	10
Service and Support	10

## System Overview

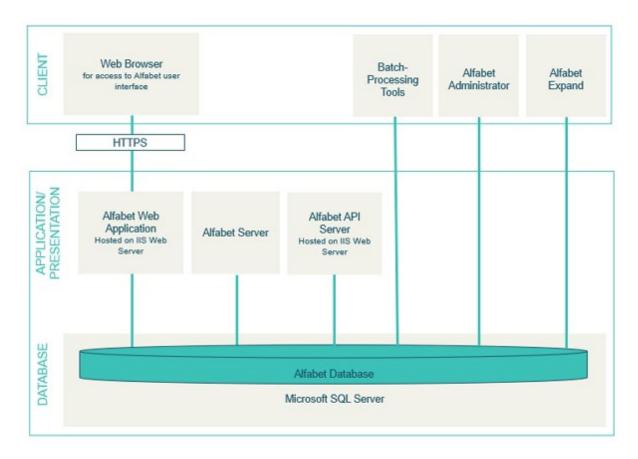

FIGURE: Alfabet components

An Alfabet installation on server side consists of two layers:

- Database layer: One or a cluster of database servers. An instance is based on a single database.
- Solution/Presentation layer: 1 or multiple Web Servers running an Alfabet Web Application and a single running Alfabet Server.

For use of the Alfabet RESTful services one or multiple separate web applications Alfabet API Server running on the same or different Web Servers as the Alfabet Web Application.

If the server side components are installed on different host, all hosts must have the same server time.

Users can access Alfabet via a browser. In the following, the access via the browser is called Alfabet Web Client.

Software AG provides a number of tools for the administration and configuration of Alfabet that can connect to the database in parallel to the Alfabet Web Application and the Alfabet Server:

Configuration Tool	Functionality		
Alfabet Administrator	Edit the configuration files of the Alfabet Web		
	Application and the other tools for		
	configuration and administration and manage		
	the database. Configure access permissions		
	to Alfabet and track Alfabet usage and audit		
	history.		
Alfabet Expand	Configure the Alfabet solution. Many Alfabet		
	functionalities as well as administrative tasks		
	are based on a specific solution configuration		
	defined in Alfabet Expand.		

### **Platform Requirements and Third-Party Components**

The requirements are listed for use by up to 200 users.

Requirement	database	Alfabet Web Application	Alfabet API Server	Alfabet Server	Alfabet Expand	Alfabet Administrator	Alfabet Web Client
Server Platform	Dependent on database server.	Windows Server 2022 with Microsoft® IIS 10.0 and ASP.NET ("Application Server")	Windows Server 2022 with Microsoft® IIS 10.0 and ASP.NET ("Application Server")	Windows Server 2022	Windows® 10 Windows Server 2022	Windows® 10 Windows Server 2022	Any platform on which one of the supported browsers can be run. System performance must meet current standards.
Processors	4 (minimum 2) Generation Intel® Xeon® Platinum 8370C processors up to 3.5GHz	4 (minimum 2) Generation Intel® Xeon® Platinum 8370C processors up to 3.5GHz	4 (minimum 2) Generation Intel® Xeon® Platinum 8370C processors up to 3.5GHz	4 (minimum 2) Generation Intel® Xeon® Platinum 8370C processors up to 3.5GHz	Intel® or compatible Minimum 2 GHz; recommended Intel Pentium IV with 3.0 GHz	Intel® or compatible Minimum 2 GHz; recommended Intel Pentium IV with 3.0 GHz

#### **Database**

Туре	Relational
Data integrity	Verification of primary keys; physical integrity ensured by database architecture
Database storage (backup)	Manual and batch-driven
Maximum number of indices in a database table	Limited by database
Data model	Included in database

#### **Alfabet Web Client**

Screen size	Alfabet is suitable for use on tablets, laptop computers or desktop computers. It is recommended to use a screen size of 1024 x 768 at 96 dpi for best working experience.
Browser	Microsoft® Edge®  Google Chrome® 37.0 or higher
	Mozilla® Firefox® 24.0 or higher
	Apple® Safari® 7.0 or higher
Browser plug-ins	Not necessary
Minimal encryption length for SSL/TLS	None
Java® applets	Not necessary
Sun® Java® plug-in	Not necessary
Session cookies	Required
Persistent (tracking) cookies	None
JavaScript®	Must be enabled for the Web browser.
Image content1	Must be enabled for the Web browser.

#### **Network and Communication Between Components**

Regarding security mechanisms for communication channels, see the section Security.

Network bandwidth	Minimum 10 MBit/s; recommended: 1 GBit/s free bandwidth for connections between server components and for each concurrent Client/Server connection
Round Trip Delay	Required < 5 ms; recommended < 1 ms
Internet Protocol Compatibility	IPv4, IPv6

#### **Security**

Authentication of users	<ul><li>Username and password</li><li>Windows authentication</li><li>LDAP</li><li>SSO</li></ul>
Other authentication mechanisms	On request
Data encryption	User passwords are encrypted during storage (non-symmetric SHA-1 encryption) and transmission (symmetric encryption using the Rijndael algorithm).  Server variables are encrypted during storage and transmission (256-bit Advanced Encryption Standard (AES) with a unique salt value for every variable ).  Both encryption mechanisms are compliant with FIPS.
Password policies	Configurable

#### **Sending Emails via SMTP Server**

Alfabet supports the generation of e-mails for a variety of purposes. To successfully send e-mails, an SMTP server is required. An existing enterprise SMTP server can be used, or a local SMTP server can be installed on the web server host. The SMTP server must be configured to accept e-mails originating from the Alfabet Server without authentication. The address of the

web server must be specified in the server alias configuration used for the Alfabet Server and the Alfabet components must be configured to send emails.

#### **Data Exchange with Microsoft Office Formats**

For interactions involving the export or publication to or import from Microsoft® Word, PowerPoint®, or Excel® files, Microsoft Office products 2003, 2007, 2010, 2013, and 2016 are supported.

If sensitivity labels are used, the sensitivity label of the documents must be Public to upload a document or import data from a document.

#### **Third-Party Code Used in Alfabet**

This software includes software code owned or provided by third-party licensors. A complete list of third-party components is provided in Empower under <a href="https://documentation.softwareag.com/legal/products/AFL">https://documentation.softwareag.com/legal/products/AFL</a> 11.6 terms.pdf

#### **Service and Support**

Please open a ticket in the Empower eService for any service request as well as all non-standard support incidents such as training requests, scripting, or data integration:

https://empower.softwareag.com

When you submit a ticket for a service request, you should include the main release number and patch version of your Alfabet product. This information can be accessed by clicking **Help** < **About Alfabet**. Tickets will be recorded and transferred to the relevant team.

Empower eService also includes:

- tracking ticket statuses
- local telephone numbers for support.

In addition to the local support telephone numbers, you can use the following toll-free number:

+800 2747 4357
